About Us

At **AZA Electro-Mechanical**, we see every challenge as an opportunity to dream bigger and bring our ambitions to life. We believe our only limits are the ones we give ourselves.

Since day one we have relentlessly pursued a better way. We were founded out of a belief that the industry could be more efficient, innovative and responsible and over the last 25 years AZA Electro-Mechanical management and team has built a reputation and track record for delivering projects faster, safer and better than ever before.

We connect expertise across the entire property and infrastructure lifecycle to help our clients, people, communities and society achieve more than they believe possible.

About Us

It is our incredible breadth, scale and diversity of experience that enables us to quickly and effectively respond to market needs and challenge the status quo

Today, we remain a privately owned business that has grown organically across UAE states..

“The driving force behind our success is our people who, with their collective expertise, push us to think differently and bravely lead the way.

Our culture respects equality, values diversity and encourages individuality – accepting and appreciating all views and beliefs and providing an environment for ideas to come alive. ”

Our Values

Our Vision

Through its rich resources coupled with the high quality technical and managerial staff , AZA Electromechanical Works recognizes any challenge posed by new projects regardless of the size or complexity of the project with its commitment to competitive prices and compliance to all quality standards.

Our Mission

Adopting the highest standards of quality, AZA Electromechanical Works is competent to provide a wide range of services with the objective of gaining its clients satisfaction. The company undertakes the development of a special concept that would make us a leader in our field at the technological and technical levels. Our mission also focuses on professionalizing our care and enhancing their potential, so that we stand out among our peers.

Car Parking Supermarkets
Labour Camps Shopping Centers

Smart Farms

This approach gives farmers tools and strategies to improve yields and sustainability of agricultural production

Quality Policy

AZA Electromechanical Works quality aims at :

Providing contracting and maintenance services through the use of the latest state of the art technology following the highest international standards implemented in this field so as to attain the customer's satisfaction.

Providing necessary maintenance for all the related works such as air conditioning, drainage works, electrical, fire fighting and alarm systems.

Developing and promoting itself through depending on its data sources, market researches, customer survey and evaluation of its performances in the field.

Management Approach

In order to endure the successful completion of any project, our management strongly emphasizes the importance of the following:

- Focus on cooperation and not on confrontation.
- Allocation of key team members during pre-qualification period, given early understanding and ownership.
- Early appointment to assure adequate level of coordination and cooperation between all parties in the pre-commencement phase.
- Workshops to define the key aspects and objectives for the project.
- Experienced site-based project management team.
- Combined team approach to achieving objectives.
- Structure system for all communications ensuring information transfer in clear and understood.
- Development of detailed Method Statements for all aspects of the works incorporating associated 'Health and Safety Risk Assessments'.

Managment Approach

- Development of a fully coordinated program. Integrating and sequencing all activities from order to handover.
- Setting up manageable control systems for information, progress monitoring and costs, which identify the key issues early, allowing effective decisions making.
- Development of a fully coordinated program. Integrating and sequencing all activities from order to handover.
- Setting up manageable control systems for information, progress monitoring and costs, which identify the key issues early, allowing effective decisions making.
- Building on the above objectives, our company has developed and effective management system with experienced pro-active personnel giving our client a comprehensive service.
- On-Site and Off-Site Safety.
- Customer satisfaction to the fullest.

QHSE Policy

Quality, Health, Safety and Environmental Policy

AZA Electromechanical depends on the ability to continually improve the quality of contracting services while protecting people and the environment. Emphasis must be placed on human health, operational safety, environmental protection and quality improvement. This commitment is in the best interests of all our clients, employees, sub- contractors, suppliers, and the communities in which we live and work.

“

AZA Electromechanical requires the active commitment and accountability for, QHSE from all employees, sub-contractors and suppliers. Management has a leadership role in communicating, implementing, and complying with QHSE policies and standards.

”

QHSE Policy

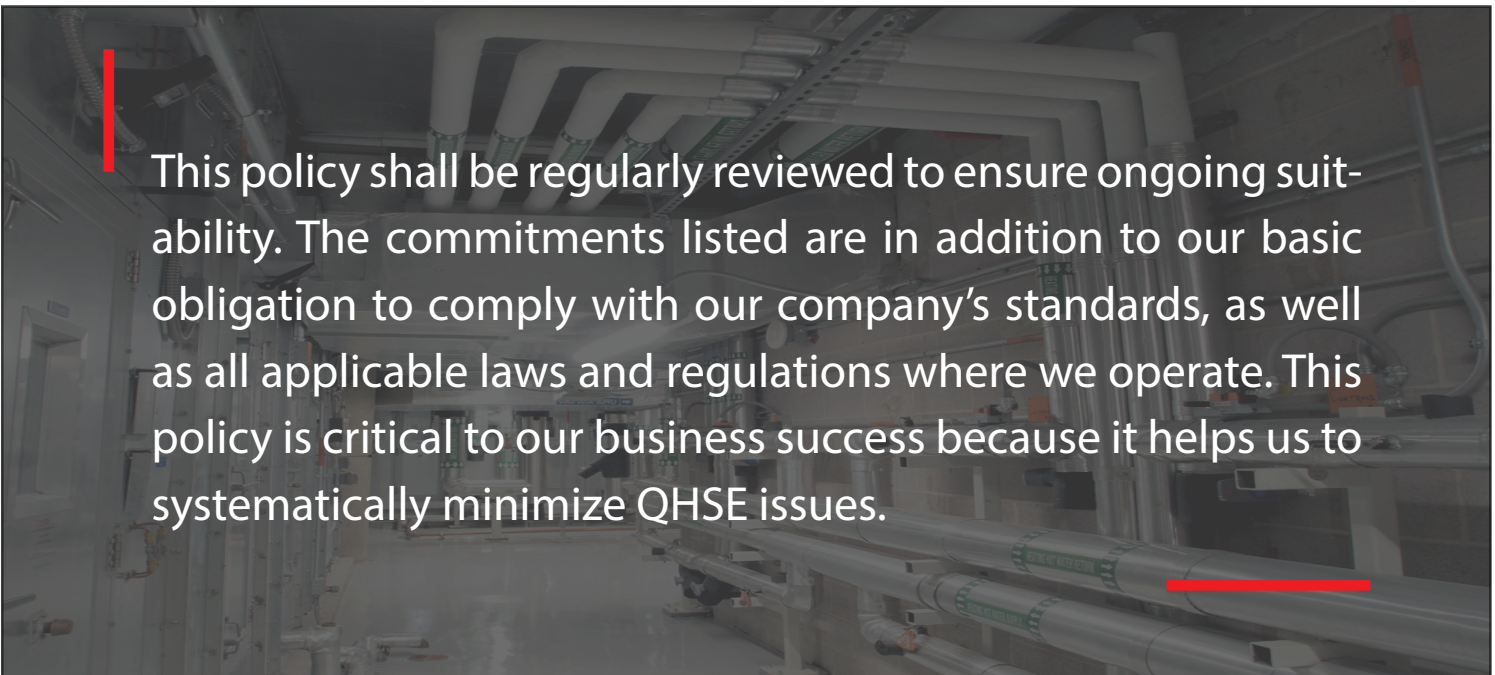

**WE ARE
COMMITTED TO:**

- Protect, and encourage the health, safety and security of our people and strive for improvement, at all times.
- Identify and eliminate waste, minimize Quality non-conformances and HSE incidents.
- Ensure continuous client satisfaction in attending most specified requirements.
- Set Quality & HSE objectives, measure results, assess, and continually improve processes, services, product's quality and HSE performance, through the use of an effective management system.

QHSE Policy

- Plan for, respond to, and recover from any emergency related to QHSE.
- Minimize our impact on the environment through pollution prevention, reduction of natural resources consumption and emissions, and the reduction and the recycling of waste.
- Apply our technical skills to all QHSE aspects and impacts in the project delivery system.
- Communicate our QHSE policies, standards, programs and performance with our internal and external parties and reward outstanding QHSE performance.

A background image of an industrial facility with complex piping and machinery, overlaid with a semi-transparent dark grey box containing text. A red vertical line is on the left and a red horizontal line is on the right of the text box.

This policy shall be regularly reviewed to ensure ongoing suitability. The commitments listed are in addition to our basic obligation to comply with our company's standards, as well as all applicable laws and regulations where we operate. This policy is critical to our business success because it helps us to systematically minimize QHSE issues.

Quality Procedures

AZA Electromechanical has established an Integrated Management System (IMS) which consists of a variety of documented principles and procedures that describe the operations & requirements within the company. Also, closely linked to the IMS Procedures are the Training Programs being developed currently within the Company? These will be modules used to train new entrants to the company in the various departments.

Quality Procedures

Sales Procedures

These procedures outline the internal processes of the Sales Unit. They describe the procedure followed to generate a response to a client's inquiry. These procedures describe the responsibilities of each employee within the Sales Unit including the Sales and Estimation Manager and the Support Engineers.

Engineering PROCEDURES

These procedures outline the internal processes of the Engineering Unit. They describe the procedure followed from the time a contract is signed to the point where shop drawings are developed. These procedures also detail the various steps required to obtain Local authority approvals. In addition, they describe the responsibilities of each employee within the Engineering Unit including the MEP Manager, Head of Engineering Section, Mechanical Engineers, Electrical engineers as well as the Draftsmen.

Quality Procedures

Construction Procedures

These procedures outline the internal processes of the Construction Department. They describe the procedure followed in the execution of a job from the point the shop drawings are developed to the time when the works are completed and the completion certificate is issued. In addition, they describe the responsibilities of each employee within the Construction Department including the Project Manager(s), Project Engineer(s), Site Engineer(s) and Foremen

Quality Procedures

Procurement, Planning and Cost Control Procedures

These procedures outline the internal processes of the Procurement, Planning and Cost Control Department. They describe the procedure followed in the ordering of material as well as the control of its quality and quantity. These procedures describe the submittal requirements for each project in regards to materials, drawings and the various reports generated during the life of a project including the Construction Schedule, Manpower Requirement, and Cash Flow Analysis. In addition, they describe the responsibilities of each employee within this department including the Head of Procurement, Planning and Cost Control Supervisor, Quantity Surveyor(s), and the Procurement Officer(s) and Assistant(s).

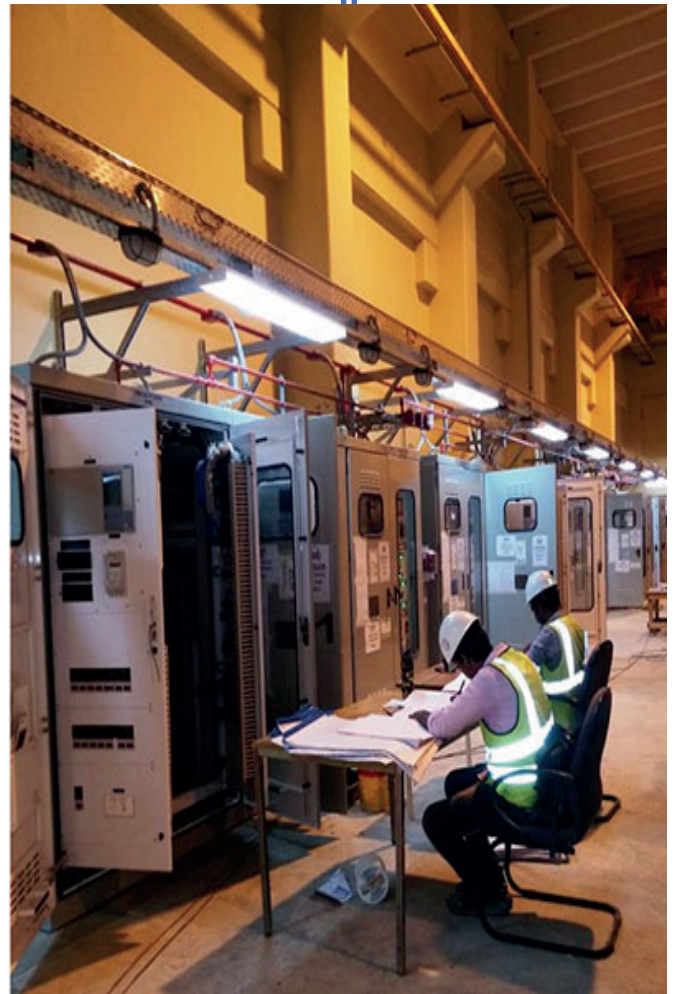

Administration Procedures

These procedures outline the internal processes of Administration Department. They describe the procedure followed in the Accounting, Personnel and IT Units. In addition, they describe the responsibilities of each employee within this department.

Testing and Commissioning

AZA Electromechanical has 'Testing and Commissioning' procedures and tools that are widely used in electrical and mechanical industry. We have listed below these, which can commission any scale project.

- Air Flow Hood
- Air Flow Propeller Air Flow meter / Anemometer
- Sound Measuring Meter
- Pressure Measuring Meter
- Temperature Measuring Meter
- Pitot Tube Type Delta Pressure Meter
- Megger
- Earth Tester
- Multimeters
- Clamp meters

Service & Maintenance

AZA Electromechanical has a special program for the 'After Sales Services'. We realize the necessity of the periodical service and maintenance for the mechanical equipment installed in this region.

Our special service team carries out routine checkup every three months, for all installations done within the Emirates.

We arrange a technicians reaching to your location within a day or before in the Emirate. We carry spare parts stock suitable for our installations in all subjects.

We appoint 24 hours operational contact personal speaking Arabic and English for the particular project for the end user's convenience.

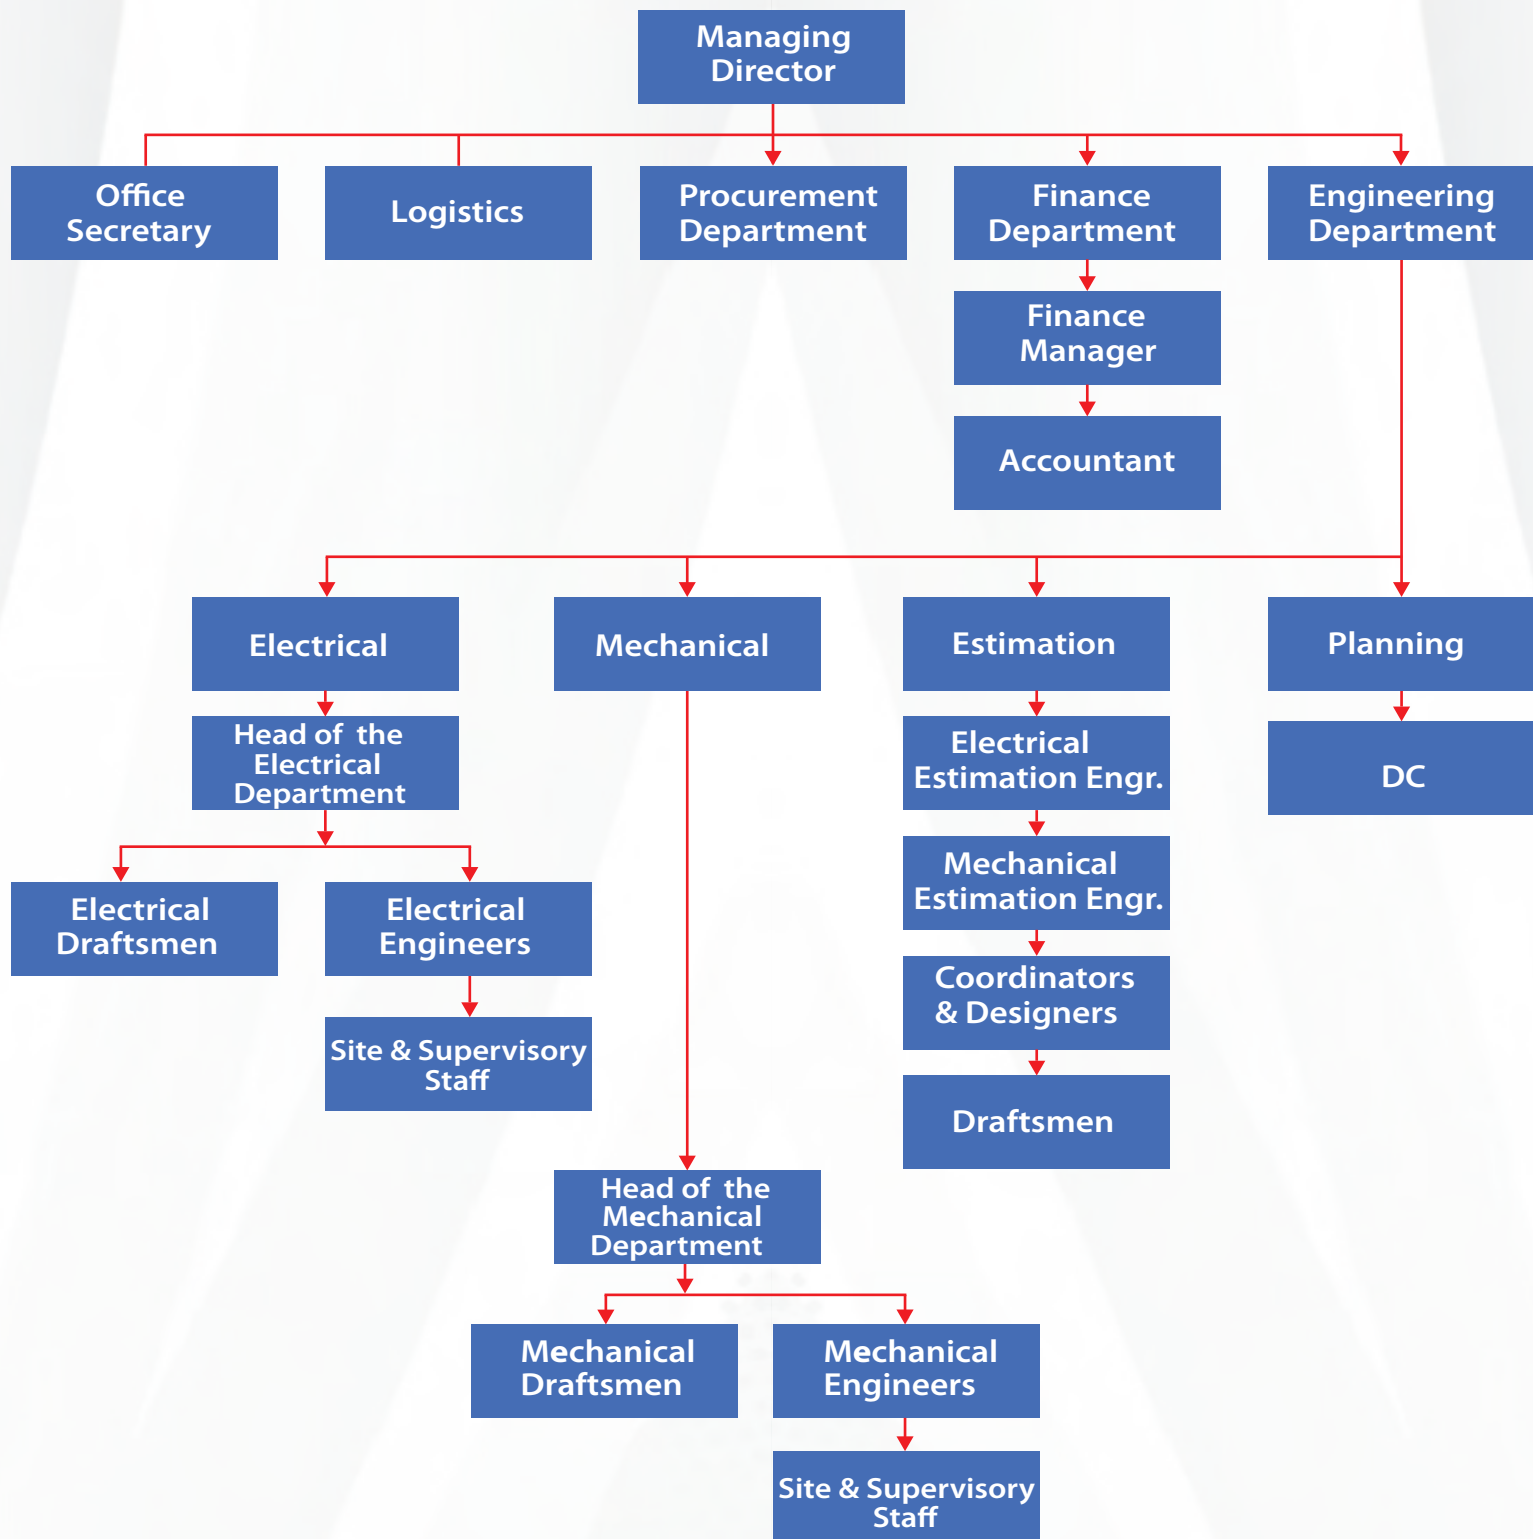

Assets & Equipment

We are equipped with the following tools and machineries:

<u>Sl. No.</u>	<u>Description</u>	<u>Qty</u>
1.	Air Compressors	02
2.	Generators	2
3.	Lifting Equipment	03
4.	Sand Blast Equipment	01
5.	Vehicles	5
6.	Welding Machines (STIC/MIG)	02
7.	Threading Machines	02
8	Pumps (Pressure)	03
9.	Containers	03
10.	Vacuum Pumps	01
11.	Mobile Platforms	07
